

ALL BABIES ARE NOT THE SAME

Your doctor has prescribed **SYNAGIS**[®] to protect your baby against severe RSV disease

Here's what you need to do...

Schedule monthly SYNAGIS appointments

with your baby's doctor for the whole RSV season.*

Each SYNAGIS dose can protect your baby's lungs from severe RSV disease for 28 to 30 days.

Try to schedule all SYNAGIS appointments in advance.

Answer the phone

to approve your baby's next SYNAGIS dose.

If you miss this call, listen to the voicemail and call the phone number provided.

Your approval is needed for your baby to get SYNAGIS.

*A baby may receive 5 or more monthly doses of SYNAGIS during the RSV season. RSV seasonal onset and duration can vary by year and geographic region. Year-round activity has been reported in Florida and Puerto Rico.

What is SYNAGIS[®] (palivizumab)?

SYNAGIS is a prescription medication that is injected (50 mg and 100 mg) in certain children to help prevent serious lung disease caused by respiratory syncytial virus (RSV). You should know that SYNAGIS is used to *prevent* RSV, and *not to treat* children who already have RSV, including children:

- born prematurely (at or before 35 weeks) **and** who are 6 months old or younger at the beginning of RSV season
- diagnosed with a chronic lung condition called bronchopulmonary dysplasia (BPD) that needed medical treatment within the last 6 months **and** who are 24 months old or younger at the beginning of RSV season
- born with certain types of heart disease **and** who are 24 months old or younger at the beginning of RSV season

You Should Know: It is not known if SYNAGIS is safe and works in children who are over 24 months old when they started taking SYNAGIS.

RSV=respiratory syncytial virus.

Please see additional Important Safety Information on page 2. See full [Prescribing Information](#) for SYNAGIS, including Patient Information.

IMPORTANT SAFETY INFORMATION

You Should Know: SYNAGIS may cause severe allergic reactions.

- Signs and symptoms of a severe allergic reaction could include:
 - Severe rash, hives, or itchy skin
 - Swelling of the lips, tongue, face, or throat or difficulty swallowing
 - Difficult, rapid, or irregular breathing
 - Bluish color of skin, lips, or under fingernails
 - Muscle weakness or floppiness
 - Unresponsiveness

SYNAGIS[®]
PALIVIZUMAB

25+ YEARS OF PROTECTING
THE MOST VULNERABLE BABIES FROM RSV

ALL BABIES ARE NOT THE SAME

Regular monthly **SYNAGIS**[®] doses can protect your baby for the entire RSV season

SYNAGIS starts working right away to protect your baby's lungs from severe RSV disease.

Each SYNAGIS dose lasts for 28 to 30 days.

Your doctor will give your baby SYNAGIS doses **each month during the RSV season.**

As your baby grows, your doctor will adjust the SYNAGIS dose.

Each month, your baby will get the right dose for their weight.

SYNAGIS has protected the most vulnerable babies from **severe RSV disease for 25+ years**

IMPORTANT SAFETY INFORMATION (continued)

Call the child's healthcare provider or get medical help right away if the child has any of the signs or symptoms of a severe allergic reaction after getting SYNAGIS. They can be life threatening or cause death.

You Should Know: SYNAGIS is given by injection. If the child has a problem with bleeding or bruises easily, an injection could cause a problem.

Before the child takes SYNAGIS, you should tell the child's healthcare provider about all their medical conditions and medicines including vitamins, supplements, and herbal remedies.

What are the possible side effects of SYNAGIS?

The most common side effects are fever and rash.

You Should Know: These are not all the possible side effects for SYNAGIS. For more information, ask the child's healthcare provider or review the full [Prescribing Information](#) for SYNAGIS, including Patient Information.

If you suspect that a child has experienced a side effect, call the child's healthcare provider. You may also report side effects to Sobi North America at 1-866-773-5274 or the US Food and Drug Administration (FDA) at 1-800-FDA-1088.

RSV=respiratory syncytial virus.
